

Product Requirements Document (PRD)

Project Name

ArcadePulse

Project Type

Browser Based Online Gaming Website Prototype

1. Project Overview

ArcadePulse is a browser based gaming website prototype designed for casual players who enjoy short challenge driven experiences and lightweight browser entertainment. The platform focuses on helping users discover skill based mini experiences, participate in seasonal competitions, track achievements, and compare rankings through structured leaderboard systems.

The project aims to create a visually engaging yet accessible digital environment that encourages repeat engagement through progression systems and challenge participation. The website is intended as a frontend focused experience and does not include playable games, multiplayer functionality, or backend systems.

The final product should deliver a responsive multi page gaming website with clear navigation, organized content hierarchy, and a visually consistent gaming inspired interface.

2. Problem Statement

Many online gaming platforms prioritize experienced users and complex systems, making casual entertainment difficult to access for users seeking quick and lightweight experiences. Overcrowded interfaces, inconsistent navigation, and unnecessary complexity often reduce engagement for visitors looking for short gaming sessions.

ArcadePulse addresses this challenge by providing a structured and approachable browser based experience where users can quickly discover activities, monitor progress, and engage with challenge based content without friction.

3. Project Goals

The website should support the following business and user goals:

Improve Game Discoverability

Users should be able to browse games quickly through organized sections, category cards, featured content, and search functionality.

Encourage Repeat Engagement

Achievements, rankings, seasonal challenges, and progress tracking should motivate users to revisit the platform.

Maintain Accessibility

Navigation and layouts should remain simple enough for first time visitors and casual users.

Ensure Device Compatibility

The experience should function consistently across desktop, tablet, and mobile devices.

4. Target Audience

Primary Audience

Casual gamers aged 16 to 35 who enjoy:

- Lightweight browser experiences
- Short challenge based activities
- Achievement systems and rankings
- Quick entertainment sessions
- Visually rewarding interfaces

Secondary Audience

Users who casually explore gaming communities and prefer low commitment entertainment experiences.

5. Functional Requirements

The website must contain exactly **7 pages** with consistent navigation and visual identity.

Homepage

The homepage should introduce the platform and guide visitors toward featured content.

Required sections:

- Hero section
- Minimum 4 featured challenge cards
- Minimum 4 game category cards
- Leaderboard preview with at least 5 players
- Seasonal challenge highlight section
- Footer navigation

Game Discovery Page

The discovery page should help visitors explore gaming content.

Required functionality:

- Search bar
- Minimum 6 game cards
- Category filtering
- Featured recommendations section

Each game card should contain:

- Title
- Description between 20 and 40 words
- Difficulty label
- Thumbnail placeholder

Player Dashboard

The dashboard should visually organize player progress.

Required sections:

- Profile summary
- Minimum 6 achievement badges
- Progress tracking section
- Minimum 5 recent activity items
- Reward milestone section

Leaderboard Page

The leaderboard should encourage engagement through rankings.

Required sections:

- Weekly rankings
- Monthly rankings
- Seasonal rankings

Each ranking section must contain:

- Minimum 10 player entries
- Username
- Score or achievement metric
- Ranking position

Seasonal Challenges Page

Required content:

- Minimum 3 active challenge cards
- Minimum 2 upcoming challenge cards
- Countdown placeholders
- Reward preview section

FAQ Page

The FAQ page should include at least **8 questions and answers** covering:

- Account access
- Rankings
- Challenge participation
- Rewards
- Achievement systems
- Technical support

Contact Page

Required elements:

- Name field
 - Email field
 - Message field
 - Category dropdown
 - Contact information section
-

6. Design Requirements

The website should feel modern, energetic, and gaming inspired while remaining easy to navigate.

Visual Direction

- Card based layouts
- Clear spacing between sections
- Rounded corners between 8px and 16px

- Consistent navigation visible on every page

Color Usage

Use no more than **4 dominant interface colors**.

Recommended palette:

- Background: #111827
- Accent Blue: #2563EB
- Highlight Purple: #7C3AED
- Neutral Text: #E5E7EB

Typography

Use modern sans serif typography.

Accepted options:

- Inter
- Poppins
- Roboto
- Open Sans

7. Responsive Requirements

The website must remain functional across:

- Desktop: 1440px
- Tablet: 768px
- Mobile: 375px

Responsive layouts should maintain readability, clear spacing, and non overlapping content.

8. Technical Requirements

Accepted implementation approaches include:

- HTML
- CSS
- JavaScript
- React
- Tailwind CSS
- Bootstrap

The project focuses on frontend implementation only.

9. Scope Boundaries

The following items are outside project scope:

- Real playable games
 - Multiplayer systems
 - Payment systems
 - Backend authentication
 - Database setup
 - Real time leaderboard updates
 - Hosting or deployment
-

10. Deliverables

The final project should include:

- Seven complete website pages
 - Responsive layouts
 - Organized navigation system
 - Required interface sections
 - Structured placeholder content
 - Frontend implementation files
-

11. Success Criteria

The project will be considered successful if:

- All seven required pages exist
- Required content quantities are met
- Navigation remains consistent across pages
- Responsive layouts function correctly
- Typography and spacing remain organized
- No copyrighted gaming brands appear
- Scope boundaries are respected

The final experience should feel visually organized, engaging, and approachable for casual gaming audiences.
