

Product Requirements Document (PRD)

Project Name

ArcadePulse

Project Type

Browser Based Online Gaming Website Prototype

Project Overview

ArcadePulse is a browser based gaming platform focused on quick challenge driven experiences for casual players. The platform aims to create an engaging environment where users can explore lightweight browser based games, participate in seasonal challenges, track achievements, and compare rankings through leaderboard systems.

The platform should provide a visually engaging but easy to navigate experience that encourages repeat visits through progression systems, challenge participation, and community interaction.

The project focuses on a frontend gaming website prototype rather than a fully functional multiplayer gaming platform.

Problem Statement

Many casual players prefer lightweight gaming experiences that do not require lengthy downloads, complicated account setup, or competitive pressure from advanced multiplayer environments. Existing gaming websites often feel overcrowded, visually inconsistent, or difficult for casual users to navigate.

ArcadePulse addresses this problem by providing a simplified browser based experience focused on quick skill challenges, accessible navigation, and visually rewarding player progression.

Business Objective

The primary objective is to build an engaging gaming themed website that:

- Encourages repeat visits through seasonal challenges
- Promotes user engagement through achievements and rankings
- Improves game discoverability through organized browsing
- Creates a visually memorable gaming identity
- Maintains accessibility for casual users

Target Audience

Primary Audience

Casual gamers between the ages of 16 and 35 who enjoy:

- Lightweight gaming sessions
- Quick challenge based activities
- Competitive but low pressure experiences
- Achievement systems and rankings
- Simple interfaces without complex onboarding

Secondary Audience

Visitors who explore gaming communities casually and prefer discovering games through curated recommendations and trending sections.

Product Goals

The website should achieve the following goals:

1. Provide intuitive navigation between all website sections.
 2. Maintain a consistent gaming inspired visual identity.
 3. Present challenge systems in a rewarding way.
 4. Encourage engagement through rankings and progression.
 5. Remain usable across desktop, tablet, and mobile devices.
-

Core Features

Homepage

Features:

- Hero section
- Featured challenge cards
- Game categories
- Seasonal highlights
- Leaderboard preview
- Navigation menu
- Footer links

Purpose:

The homepage should introduce the platform identity and direct users toward important areas quickly.

Game Discovery Page

Features:

- Search functionality
- Category browsing
- Filter section
- Featured recommendations
- Game cards with descriptions

Purpose:

Help visitors discover new gaming experiences through structured browsing.

Player Dashboard

Features:

- Achievement badges
- Progress tracking
- Activity history
- Reward milestones
- Profile summary

Purpose:

Allow players to monitor activity and progression visually.

Leaderboard Page

Features:

- Weekly rankings
- Monthly rankings
- Seasonal rankings
- Player ranking information

Purpose:

Encourage friendly competition and repeated engagement.

Seasonal Challenges Page

Features:

- Active challenge cards
- Upcoming challenge previews
- Countdown placeholders
- Reward information

Purpose:

Support repeat visits through limited time challenge visibility.

FAQ Page

Features:

- Common platform questions
- Achievement explanation
- Reward system explanation
- Technical support guidance

Purpose:

Reduce confusion and improve onboarding.

Contact Page

Features:

- Inquiry form
- Contact categories
- Message submission layout

Purpose:

Provide a clear communication channel for support.

Design Direction

The website should maintain a modern gaming inspired visual direction.

Visual expectations:

- Dark interface styling
- Card based layouts
- Maximum four dominant interface colors
- Sans serif typography
- Consistent spacing and hierarchy
- Responsive navigation

Recommended palette:

- Background: #111827
 - Accent Blue: #2563EB
 - Highlight Purple: #7C3AED
 - Neutral Text: #E5E7EB
-

Responsive Requirements

The website must support:

- Desktop width: 1440px
- Tablet width: 768px
- Mobile width: 375px

Layouts should remain functional and readable across all supported widths.

Technical Scope

Accepted implementation approaches:

- HTML
- CSS
- JavaScript
- React
- Tailwind CSS
- Bootstrap

The project focuses on frontend implementation only.

Out of Scope

The following functionality is not expected:

- Real playable games
 - Multiplayer systems
 - Payment systems
 - Backend authentication
 - Database integration
 - Real time updates
 - Admin dashboard functionality
 - Hosting and deployment
-

Deliverables

Expected deliverables include:

- Seven complete website pages
 - Responsive layouts
 - Consistent navigation
 - Required interface sections
 - Structured placeholder content
 - Organized frontend files
-

Success Criteria

The project will be considered successful if:

- All required pages exist
- Navigation works consistently
- Responsive layouts function correctly
- Content requirements are met
- Visual hierarchy remains consistent
- No copyrighted gaming brands appear
- Scope boundaries are respected
